Access Gate IDMZ

A full industrial DMZ in one appliance, inserted beside your IT firewall without downtime. It brings visibility, a bastion, privileged access management, authentication, protocol hardening, session recording and logging to the boundary between IT and OT.

01 · THE TWO SIZES

The same software runs on both sizes. A Virtual option runs on your own hypervisor, sized with our team.

	Small ACCESS GATE IDMZ	Large ACCESS GATE IDMZ
FORM FACTOR	1/2U, fanless	1U rack
RECOMMENDED FOR	Up to 200 assets	Up to 1,000 assets
PROCESSOR	Intel Celeron J6412, 4 cores, 10 W TDP	AMD EPYC 4244P, 6 cores at 3.8 GHz, 32 MB L3, 65 W
MEMORY	16 GB DDR4-3200 SO-DIMM	16 GB DDR5-6400, unbuffered
STORAGE	256 GB M.2 SSD	512 GB NVMe PCIe 4.0 M.2 2280. Two 2.5 in hot-swap bays free.
NETWORK PORTS	4 × 2.5GbE RJ45	4 × 1000Base-T RJ45, Broadcom BCM5719 on OCP 3.0
POWER	12 V DC external supply	100 to 240 V AC, C13/C14
FIRMWARE AND OS	BOTH FreeBSD firmware. Trout CyberOS™.	
HARDWARE WARRANTY	BOTH 3 years parts and labour. Assembled and tested before shipping.	

02 · WHAT THE DMZ DOES

VISIBILITY	Every machine between IT and OT, listed and kept current, with its zone and its services.
BASTION AND PAM	Users sign in on a login portal and reach only the machines their permissions allow, through a built-in web client or their own fat client.
PROTOCOL HARDENING	Per machine and per protocol rules. Everything else stays blocked.
SESSION RECORDING AND LOGGING	Every session is recorded and logged. Logs export through an rsyslog pipeline; the assessment exports as PDF.
HOW IT ATTACHES	Connect it to the existing network, beside your firewall. Route the flows you want to protect through it, one at a time. Devices keep their IP addresses, and nothing is installed on any machine.
OUTBOUND	None required. Policies, logs and session recordings stay on the appliance, so it runs air-gapped.
ASSETS BEHIND IT	Anything with an IP address on site: PLCs, HMIs, SCADA servers, CNC machines, robots, historians, engineering workstations, IT servers, printers, cameras, badge readers, building and energy systems.
IDENTITY	Active Directory, Entra ID, or the Access Gate directory for local users. Vendors can get temporary access without joining your corporate directory. MFA before any traffic reaches a machine.

03 · STANDARDS

FRAMEWORKS	Maps to the industrial DMZ described by IEC 62443 and NIST SP 800-82. Evidence for NIS2, DOH/DEC and CMMC programs.
YOUR FIREWALL	Fortinet, Cisco Meraki or Palo Alto stays the perimeter. The firewall change is small: a route or two.

PRICE

Small $5,745 and Large $11,240 per site, per year. Virtual is priced per core: our sales team checks the prerequisites and sends the quote. Every price covers hardware, software, updates and support. No per-seat fee, no session limit, no cloud subscription. Shipping and tax excluded.

ORDERING
One Access Gate IDMZ per site: Small for a site up to 200 assets, Large up to 1,000.
